DETAILED ACTION

1. Claims 1-4 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 recites, among other features, that the oxidation catalyst consists essentially of a single non-precious metal oxidation catalyst selected from the group consisting of Cu, Fe, Co, Tb, W, Mo, Sn, and oxides thereof. The art of record does not teach or fairly suggest this limitation. Bellows (U.S. Patent 5,955,214) teaches a mixed oxide of copper and tin; however, this is not a "single" catalyst as required by claim 1. Further, Eguchi et al (*Sci. and Tech. in Catalysis*, 1998) teaches copper supported on mixed oxides. However, the mixed oxides materially affect the catalytic performance of the catalyst, as shown in Table 1 of the reference. Therefore, the materials of the Eguchi reference are excluded by the "consisting essentially of" language of claim 1. As such, claim 1 is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
